Arm Cortex-M Processors Overview

Armv8-M Architecture Fundamentals

Cortex-M Software Development Fundamentals

Advanced Armv8-M Features

Jan 28, 2026

Nurarys Baibolat

has successfully completed the online Specialization

Arm Cortex-M Architecture and Software Development

This Specialization is designed to help anyone involved in developing software for Arm Cortex-M processors. Over four courses you will develop your knowledge of this popular microcontroller variant used in a plethora of devices throughout the world. Whether you're a computing/engineering professional, student, or hobbyist, the training aims to give you the essential knowledge and interactive experience required to get your Cortex-M software project up-and-running, avoiding costly mistakes.

Edmund Player, Applications Engineer
Peter Rielly, Application Engineer
Salman Arif, Application Engineer
Yang Song, Application Engineer
Graham Cunningham, Application Engineer
Uma Maheswari Ramalingam, Application Engineer
Solomon Tucker, Application Engineer
Walker Huang, Application Engineer

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
