Introduction to Applied Machine Learning

Machine Learning Algorithms: Supervised Learning Tip to Tail

Data for Machine Learning

Optimizing Machine Learning Performance

Jan 25, 2026

## Nurarys Baibolat

has successfully completed the online Specialization

# Machine Learning: Algorithms in the Real World

This specialization is for professionals who have heard the buzz around machine learning and want to apply machine learning to data analysis and automation. Whether finance, medicine, engineering, business or other domains, this specialization will set you up to define, train, and maintain a successful machine learning application.

Anna Koop
Senior Scientific Advisor
Alberta Machine Intelligence Institute,
University of Alberta

## Nurarys Baibolat

has successfully completed the online Specialization

# Mastering Machine Learning Algorithms using Python

Congratulations on successfully completing Mastering Machine Learning Algorithms with Python! You've gained a solid foundation in machine learning, covering everything from statistical techniques to advanced algorithms like decision trees, random forests, and support vector machines. Through hands-on Python programming and real-world projects, you've demonstrated your ability to preprocess data, build models, and optimize them effectively. This certificate recognizes your achievement in mastering essential machine learning tools and techniques, preparing you for practical applications in the field.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
